

Numerical Methods In Biomedical Engineering

The International Journal for Numerical Methods in Fluids publishes refereed papers describing significant developments in computational methods that are applicable to scientific and engineering problems in fluid mechanics, fluid dynamics, micro and bio fluidics, and fluid-structure interaction.

The 2nd International Conference on Numerical Modelling in Engineering will be held from August 19 to 22 in Beijing, China. The overall objective of the conference is to bring together international scientists and engineers in academia and industry in fields related to advanced numerical techniques, such as FEM, BEM, IGA, etc., and their ...

Publisher Summary. This chapter provides an overview of research in cardiac surgery devices. An explosion in multidisciplinary research, combining mechanical, chemical, and electrical engineering with physiology and medicine, during the 1960's created huge advances in modern health care.

This review focuses on direct numerical simulations (DNS) of turbulent flows laden with droplets or bubbles. DNS of these flows are more challenging than those of flows laden with solid particles due to the surface deformation in the former.

Computational Research Progress in Applied Science & Engineering: An international Journal (CRPASE), ISSN: 2423-4591 is a multidisciplinary peer-reviewed journal founded in 2014 and devoted to the prompt publication of peer-reviewed articles related to all aspects of computational methods in applied science and engineering.

CRPASE

Biofluid dynamics is the bridge between computational engineering and medical sciences that aims at applying fundamental principles of fluid mechanics to explain the mechanisms of biological flows and their interrelationships with physiological processes.
